## Summary of Changes from the 2002 Training Manual and Credentials Package

Use of a cadaver is now permitted for both temporo-mandibular joint radiographs and dental series radiographs.

Evaluation forms used by the Credentials Committee when reviewing Case Reports and Radiograph Sets are now available on the web-site. Case Report Information has been expanded.

Pre-Approval case reports and radiographs will be rated as either Approved or Non-Approved; the Credentials Committee can request clarification of an item by the applicant before making the Approval/Non-Approval decision.

Resubmission of Pre-Approval items rated Non-Approved will not be permitted.

The Credentials Committee now has two Review Teams, to speed up the Pre-Approval review process.

Policy on supervision of training by dual-diplomates has been clarified. A "Recommended Initial Equipment List" is now available for applicants who are at the start of their training program.

The AVDC check list for Equipment, Instruments and Supplies at the time of Pre-Approval Review or Credentials Application is now available on the web-site.

All of the current AVDC polices and procedures affecting applicants are now described in the web-pages and .PDF files accessible from [Applicant Information](#).
